#### Non Technical

3. Lab Assistant [Non Technical]: Rs 10000/- [1 Year Agreement, Transportation allowance provided]
4. Field Agent: Rs 12000/- [1 Year Agreement, Transportation allowance provided]

### Check below before applying

At NTHRYS, we are committed to maintaining a high standard of expertise and professionalism. Before applying for any position with us, please ensure you meet the following eligibility criteria for technical placements only:

#### 1. Project Guidance Requirements:

- Only candidates who have completed projects under the mentorship of an industry scientist or experienced mentor are eligible to apply.
- Projects done in college settings, diagnostic labs, QC labs, or other testing labs without proper mentorship do not qualify.
- Candidates mentioning online video courses or projects without mentors as part of their experience are not eligible.
- Candidates must have been exposed to proper project methodologies during internships or project work. Those lacking this experience will not be considered.

Candidates who do not have done proper project work / internship as mentioned above and still want to join NTHRYS, they will have a probation period of 9 months where only half

of the salary will be paid.

## **2. Candidate Experience:**

- We only consider fresh graduates. Experienced candidates are not eligible for positions at NTHRYS.

## **4. Commitment Requirements:**

- A three-year agreement is mandatory.
- After one year of employment, enrolling in a Ph.D. program (with research practical expenses sponsored by NTHRYS) is compulsory.

## **5. How to Apply:**

- Candidates who meet all the above criteria should initiate communication via WhatsApp at **+91-8977624748**.

NTHRYS is thoroughly research-driven organization, and we do not entertain applications from candidates with solely monetary motivations. We seek dedicated individuals with a passion for research and development.

### **Important Note:**

We regularly receive resumes from Ph.D. and Post-Doctoral candidates. However, 99% of these applicants either lack sufficient subject matter expertise, have prioritized their financial or personal lives over their research development, or are inexperienced freshers or simply [junk freshers](#)

If you don't want to end up like the candidates mentioned above, please ensure you undertake research-oriented projects and internships strictly under the guidance of industry mentors who have successfully launched at least one recognized international product from a registered company. Start your career with a strong foundation. Do not simply follow your HODs or college guides blindly. Avoid becoming just another sales point, like a sheep doing whatever they say regarding projects and internships, as this will likely lead to poor prospects in the life sciences sector.

Please forward your resume to [h\[at\]nthrys\[dot\]com](mailto:h[at]nthrys[dot]com).

Emails without a subject line, a proper email body, or a proper email format, and those lacking a proper signature, will be automatically deleted and the sender blacklisted in our database.
