

Bio-Medical Waste Management

Bio-Medical waste management is a critical aspect of healthcare and environmental protection. At NTHRYS, we offer comprehensive bio-medical waste management services designed to handle, treat, and dispose of healthcare waste safely and efficiently.

1. Bio-Medical Waste Segregation, Collection, Transportation, Temporary Storage, Treatment and Disposal as per WHO and Government Guidelines.
2. Bio-Medical Waste Tracking System
3. Bio-Medical Waste Reports, Documentation and Audit
4. Bio-Medical Waste Management automation with SCADA access.

Our services comply with all local and international regulations, ensuring that medical facilities can operate with peace of mind. We utilize advanced technologies and methodologies to manage different types of medical waste, including infectious waste, pathological waste, sharps, pharmaceuticals, and chemical waste. Our team of experts provides end-to-end solutions, from waste collection and transportation to treatment and final disposal. NTHRYS is committed to sustainability, incorporating eco-friendly practices and technologies that minimize environmental impact. Our medical waste management solutions are designed to reduce the risk of infections, protect public health, and prevent environmental contamination. By partnering with NTHRYS, healthcare providers can focus on their core mission while we take care of their waste management needs.
