

NTHRYS WORKSHOPS

Immunohistochemistry In Biomedical Research

8:45 AM - 10:15 AM: Session 1: Role of Immunohistochemistry in Disease Research

Overview of the importance of immunohistochemistry in disease research.
Hands-on session on using immunohistochemistry to study disease pathology.
Case studies on the impact of immunohistochemistry in biomedical research.

10:15 AM - 10:30 AM: Coffee / Tea / Snacks Break

Networking and refreshments.

10:30 AM - 12:00 PM: Session 2: Immunohistochemistry in Cancer Research

Exploring the role of immunohistochemistry in cancer research.
Workshop on using immunohistochemical techniques to identify cancer biomarkers.
Case studies on the applications of immunohistochemistry in cancer diagnosis and therapy.

12:00 PM - 1:00 PM: Lunch Break

Catered lunch and networking opportunity.

1:00 PM - 2:30 PM: Session 3: Immunohistochemistry in Neurobiology

Hands-on session on the use of immunohistochemistry in neurobiology.
Exploring techniques for studying neural tissues and markers.
Practical applications of immunohistochemistry in neurological research.

2:30 PM - 2:45 PM: Short Break

Time for a stretch and informal discussions.

2:45 PM - 4:15 PM: Session 4: Clinical Applications of Immunohistochemistry

Workshop on translating immunohistochemical research into clinical practice.
Practical techniques for using immunohistochemistry in clinical diagnostics.
Case studies on the impact of immunohistochemistry on medical treatments.

4:15 PM - 4:30 PM: Coffee / Tea / Snacks Break

Last networking opportunity with snacks.

4:30 PM - 5:30 PM: Closing Session: Implementing Changes and Technology Adoption

Group discussions on implementing new techniques learned today.
Dialogue on overcoming challenges in adopting new technologies in similar sectors.
Feedback session and closing remarks.

Certificate Issue

5:30 PM: Workshop Concludes
