

Comprehensive PhD Admission Consultancy for Abroad Universities

Offered by NTHRYS Biotech Labs

Supporting Your PhD Journey – Step by Step

Research Project with Two Publication Co-Authorships

As part of our PhD Admission Consultancy Package, candidates will undertake a **hands-on research project** at our dedicated R&D facility located at **NTHRYS Biotech Labs, Cherlapalli IDA Branch, Hyderabad.**

This project is designed around the candidate's **chosen core research area** and aims to provide practical exposure to real-world scientific problem-solving — an essential strength when applying to research-intensive PhD programs abroad.

What the Research Project Includes:

- **Topic Selection & Customization:** Candidates choose or are guided to select a topic aligned with their PhD interests and current trends in global research.
- **Experimental Design:** Learn how to frame hypotheses, design experiments, and structure workflows using modern research methodologies.
- **Lab Techniques & Instrumentation:** Gain hands-on exposure to wet-lab techniques, analytical instrumentation, data collection, and troubleshooting processes.
- **Data Analysis & Interpretation:** Learn how to analyze results statistically, interpret scientific data, and draw meaningful conclusions.
- **Documentation & Reporting:** Training on maintaining lab records, writing lab reports, and creating structured project summaries in publication format.
- **Publication Process:** Our editorial and research team will guide the candidate through manuscript drafting, journal selection, and submission procedures for co-authorship in **two peer-reviewed publications.**
- **Mentoring & Review:** One-on-one mentorship throughout the project, with weekly

reviews to ensure academic rigor and research quality.

Upon completion, the candidate will receive a **Project Completion Certificate** and be credited as a **co-author in two research publications**, which significantly enhances their research profile and strengthens their PhD applications internationally.

Phase 1: Pre-Planning & Profile Assessment

- We help you identify your core research interests and academic strengths.
- Our team evaluates your eligibility based on your MSc/MTech/MPharm credentials.
- We assist in estimating financial needs and exploring funding options abroad.

Phase 2: University & Supervisor Shortlisting

- We guide you in selecting countries aligned with your goals and comfort.
- We help you shortlist universities with strong research programs in your field.
- We assist in identifying professors and labs with overlapping research interests.

Phase 3: Document Preparation & Test Planning

- Our experts help prepare key documents including your CV, transcripts, and certificates.
- We offer support for English proficiency tests (IELTS/TOEFL) and GRE (if required).
- We provide templates, examples, and personalized checklists for smooth preparation.

Phase 4: Professor Communication Support

- We help you draft effective introduction emails to potential PhD supervisors.
- Our team supports follow-up communications and interview preparations.
- We provide guidance on presenting your academic background and research vision.

Phase 5: SOP & Research Proposal Assistance

- We work with you to build a strong, customized Statement of Purpose.
- Our team supports you in crafting a research proposal aligned with global standards.
- We review and polish your drafts to ensure clarity, structure, and impact.

Phase 6: Application Portal Guidance

- We guide you through each university's application portal with checklist-based support.
- Our consultants ensure your documents are uploaded in the right format and order.
- We help manage application deadlines, fee payments, and submission confirmation.

Phase 7: Interview Preparation

- We conduct mock interviews to prepare you for professor and panel discussions.
- Our team shares insights on technical, proposal-based, and motivation questions.

Phase 8: Scholarship & Offer Handling

- We help you explore scholarship and assistantship opportunities in your chosen country.
- We assist in comparing offers and choosing the best-fit program for your goals.
- We guide you through offer acceptance and onboarding procedures.

Phase 9: Visa & Pre-Departure Guidance

- We provide step-by-step visa application support and documentation assistance.
- Mock visa interviews and embassy prep are offered as part of our package.
- We help you plan travel, accommodation, and prepare for your arrival abroad.

Who Can Avail This Service?

Our consultancy is ideal for **MSc, MTech, and MPharm students** seeking expert support to pursue PhD programs in countries like the USA, UK, Germany, Canada, Australia, and more.
