

## Biocontrol Agents as Biofertilizers by NTHRYS

[All Products](#) [Agriculture Products](#) [Back to Biofertilizers](#)

### Various Crops that can Utilize Biocontrol Agents as Biofertilizers

1. Wheat
2. Rice
3. Maize (Corn)
4. Sorghum
5. Barley
6. Millet
7. Sugarcane
8. Cotton
9. Sunflower
10. Mustard
11. Canola (Rapeseed)
12. Safflower
13. Groundnuts (Peanuts)
14. Chickpeas
15. Peas
16. Beans (Common beans, Kidney beans, etc.)
17. Lentils
18. Potatoes
19. Tomatoes
20. Onions
21. Garlic
22. Carrots
23. Cabbage
24. Cauliflower
25. Spinach
26. Brinjal (Eggplant)
27. Oranges
28. Bananas
29. Grapes
30. Pineapple
31. Strawberries

### Various Stages of Crop for Application

Biocontrol Agents as Biofertilizers are most effective when applied during seed treatment, soil

application, or as a foliar spray during key growth stages to prevent and manage diseases.

### **Advantages**

These biofertilizers help control plant pathogens by competing with them, producing antibiotics, or inducing plant resistance, resulting in healthier crops with higher yields and reduced reliance on chemical pesticides.

### **Storage / Shelf Lifting**

NTHRYS Biocontrol Agents as Biofertilizers should be stored in a cool, dry place away from direct sunlight. They have a shelf life of 12 to 18 months when stored under proper conditions.

### **Application Process**

For soil application, use 5-10 kg per hectare. For seed treatment, apply 1-2 kg per 100 kg of seeds. For foliar application, dissolve 2-5 kg in water and spray during key growth stages. Ensure even coverage for optimal protection.
