

## Compost Inoculants by NTHRYS

[All Products](#) [Agriculture Products](#) [Back to Biofertilizers](#)

### Various Crops that can Utilize Compost Inoculants

1. Wheat
2. Rice
3. Maize (Corn)
4. Sorghum
5. Barley
6. Millet
7. Sugarcane
8. Cotton
9. Sunflower
10. Mustard
11. Canola (Rapeseed)
12. Safflower
13. Groundnuts (Peanuts)
14. Chickpeas
15. Peas
16. Beans (Common beans, Kidney beans, etc.)
17. Lentils
18. Potatoes
19. Tomatoes
20. Onions
21. Garlic
22. Carrots
23. Cabbage
24. Cauliflower
25. Spinach
26. Brinjal (Eggplant)
27. Oranges
28. Bananas
29. Grapes
30. Pineapple
31. Strawberries

### Various Stages of Crop for Application

Compost Inoculants are most effective when applied during the composting process or during soil

preparation to enhance the decomposition of organic matter and improve soil fertility before planting.

### **Advantages**

These inoculants accelerate the composting process, enhance nutrient cycling, and improve soil structure, leading to healthier soils that support stronger and more productive crops.

### **Storage / Shelf Lifting**

NTHRYS Compost Inoculants should be stored in a cool, dry place away from direct sunlight. They have a shelf life of 12 to 18 months when stored under proper conditions.

### **Application Process**

For composting, apply 5-10 kg per ton of organic material. For soil application, use 5-10 kg per hectare during soil preparation. Mix thoroughly with compost or soil to ensure even distribution and optimal results.
