

Aquaculture Products

NTHRYS specializes in advanced aquaculture products with a strong focus on probiotics designed to enhance fish, shrimp and other aquacultures animals health and optimize aquaculture environments. Our probiotics are formulated to promote gut health, boost immune responses, and improve nutrient absorption, leading to healthier and more resilient aquatic species. These products help maintain water quality, reduce disease outbreaks, and support sustainable farming practices. Whether for freshwater or marine environments, NTHRYS offers targeted probiotic solutions to enhance aquaculture productivity and sustainability.
