Assistance and Outsourcing

1. **Efficacy Evaluation:** Conducting controlled tests to measure the drug's therapeutic effect against a placebo or existing treatment.
2. **Side Effect Profile:** Comprehensive monitoring and documentation of any side effects experienced by participants.
3. **Dosage Refinement:** Adjusting the drug dosage based on therapeutic response and side effect tolerance observed in Phase II trials.
4. **Statistical Analysis:** Employing advanced statistical techniques to ensure the reliability and validity of trial results.
5. **Regulatory Strategy:** Developing a strategic approach for regulatory submission based on the trial outcomes to support Phase III progression.
6. **Patient Monitoring:** Continuous assessment of patient response and well-being throughout the trial duration.
