### Assistance and Outsourcing

1. **Large-Scale Testing:** Coordination and management of multi-center trials to ensure consistent implementation and data collection.
2. **Efficacy Confirmation:** Verification of drug efficacy through extensive clinical testing and comparison with existing therapies.
3. **Safety Monitoring:** Continuous surveillance for any adverse effects, with immediate response strategies to protect participant health.
4. **Data Analysis and Documentation:** Detailed statistical analysis to support efficacy and safety claims, alongside comprehensive documentation for regulatory submissions.
5. **Regulatory Compliance:** Ensuring all aspects of the trial meet stringent regulatory standards required for drug approval.
6. **Patient Recruitment and Retention:** Effective strategies to enroll and retain a diverse participant pool, crucial for the validity of trial results.
