Assistance and Outsourcing

1. **Long-Term Efficacy and Safety Monitoring:** Ongoing observation to assess the long-term therapeutic value and adverse effects of the drug in various populations.
2. **Market Surveillance:** Gathering data from a broader user base to evaluate drug performance under diverse real-world conditions.
3. **New Therapeutic Uses:** Investigating additional benefits and applications of the drug, potentially expanding its market.
4. **Risk Management:** Developing strategies to mitigate risks based on post-marketing experience.
5. **Regulatory Reporting:** Fulfilling obligations to report findings to regulatory bodies, ensuring compliance with safety standards.
6. **Health Economics Studies:** Conducting research to assess the cost-effectiveness of the drug, supporting pricing and insurance coverage decisions.
