

Training Programs

We don't just select the best candidates; we transform them into the best through our training - Balaji S Rao

NTHRYS offers a variety of training programs designed to enhance skills and knowledge in biotechnology, environmental science, and other scientific fields. Our training programs are tailored to meet the needs of students, professionals, and organizations seeking to expand their expertise. We provide hands-on training in laboratory techniques, data analysis, research methodologies, and more. NTHRYS training programs are delivered by experienced instructors and are designed to be practical and application-focused. We offer both short-term and long-term training options, with flexible schedules to accommodate different learning needs. Participants in our training programs receive comprehensive course materials, access to state-of-the-art facilities, and personalized instruction. By participating in NTHRYS training programs, individuals and organizations can stay up-to-date with the latest developments in their field, enhance their skills, and achieve their professional goals.
